Saturday, April 23, 2016; 9:00 a.m - 12:00 p.m.

WHERE:

Genoveva Chavez Community Center, 3221
Rodeo Rd, Santa Fe, NM 87507

TESTS INCLUDE

Electrical Conductivity	
Sulfate	pH
Nitrate	Fluoride
Arsenic	Iron
Manganese	

HOW TO COLLECT WATER SAMPLE

- Use a clean glass or plastic container that holds at least a quart of water (such as a 1-liter soda bottle or gallon milk jug) without any strong odors.
- Collect the water before it runs through any water treatment/filters such as a R.O., a carbon filter, or a water softener. (If the home has a whole house filtration system, collect the water at the well head).
- Let the water run a couple of minutes before collecting the sample.
- Fill the bottle with the water as close to the time of testing as possible (right before coming to the event).
- Label the bottle with your name, address, and phone number.
